

KS5 Long Term Plan 2020-2021

Subject: English Language

Exam Board: OCR

Statement of Intent

A Level English Language will allow students to develop a knowledge of how English language works and a secure understanding of the language system. They will explore data and examples of language in use and apply concepts and methods appropriate for the analysis of language, as they:

- Explore data and examples of language in use
- Develop and apply their understanding of the concepts and methods appropriate for the analysis and study of language
- Engage creatively and critically with a varied programme for the study of English
- Develop their skills as producers and interpreters of language
- Independently investigate language in use.
- Learners will:
 - Develop a broad knowledge and understanding of the language levels (Phonetic and phonology, lexis and semantics, grammar, pragmatics and discourse).
 - Apply the language levels to a range of contexts: (historical, geographical, social and individual varieties of English, aspects of language and identity).
 - Develop their ability to apply the analytical tools to texts in varying modes, as well as to engage with current debates around language use.
 - Explore language use in particular contexts across time and place.
 - Pursue an independent language investigation, developing the skills most valued by Higher Education and employers.

Statement of Implementation

We start the course teaching the Language levels, as these need to be understood for all areas of the course.

In lessons, we use a wide range of spoken and written forms of English, including electronic and multi-modal forms from a range of contexts to engage and inspire.

- Component 01 focuses on knowledge and understanding of the language levels and application of critical analysis skills. It also includes an engaging writing production task where learners demonstrate their own language skills.
- Component 02 specifies interesting and varied contexts for further exploration of language in use: child language acquisition, language in the media and language change.

The clear distinction between the two examined components retains a balance between learners learning to analyse the language levels effectively (Component 01) and learners exploring particular contexts or functions of language (Component 02).

The Independent language research (Component 03) comprises two sections. Section A, An independent investigation of language, provides learners with the opportunity to pursue an area of study which is of particular personal interest. Section B, The academic poster, allows learners to present their research from their independent investigation in a concise and visually accessible way.

We really push our students to think and apply beyond their own expectations and develop as young adults, ready for life after school.

Our lessons include: Open discussion / Student presentations / Group / pair work/ Debates / Focused on argument and justification / Text analysis / Writing practice / Outside research / Independent Learning / Investigative / Reflective and responsive (to feedback)
