

Subject: PE

Exam Board: OCR

## Curriculum Statement of Intent

A Level PE will allow students to critically analyse and evaluate their physical performance and apply their experience of practical activity in developing their knowledge and understanding of A Level PE. The non-exam assessment allows students to explore an activity in detail as a performer or coach, analysing and evaluating performance in a chosen activity.

Physical Education will equip learners with both a depth and breadth of knowledge, understanding and skills relating to scientific, socio-cultural and practical aspects of physical education. This requires them to:

- understand how physiological and psychological states affect performance
- understand the key socio-cultural factors that influence people's involvement in physical activity and sport
- understand the role of technology in physical activity and sport
- refine their ability to perform effectively in physical activity and sport by developing skills and techniques and selecting and using tactics, strategies and/or compositional ideas
- develop their ability to analyse and evaluate to improve performance
- understand the contribution which physical activity makes to health and fitness
- improve as effective and independent learners and as critical and reflective thinkers with curious and enquiring minds

## Curriculum Statement of Implementation

**Within A level PE we look to provide the course through a variety of teaching and learning strategies so that pupils can develop all 4 components of the specification. What style of teaching and learning strategies used depends on the component being taught but we look to**

- Component 01: Physiological factors affecting performance is sub divided into three topics, Applied anatomy and physiology, Exercise physiology and Biomechanics.
- Component 02: Psychological factors affecting performance is sub divided into two topics, Skill acquisition and Sports psychology.
- Component 03: Socio-cultural issues in physical activity and sport is sub divided into two topics, Sport and Society and Contemporary issues in physical activity and sport
- Component 04: Performance in physical education (NEA) is sub divided into two parts Performance or coaching of an activity taken from the approved lists and the Evaluation and Analysis of Performance for Improvement (EAPI).

The content allows practical examples from physical activities and sports to show how theory can be applied and to reinforce understanding.

Component 01, Physiological factors affecting performance, focuses on developing the learner's knowledge of the science behind physical activity. This includes the structure and function of key systems in the human body, the forces that act upon us and the adaptations we make to our bodies through diet and training regimes.

Component 02, focuses on the psychological factors affecting physical activities and sports. This includes models and theories that affect learning and performance in physical activities, how different methods of training and feedback work and why their effectiveness differs from person to person. It also includes psychological factors affecting group dynamics and the effects of leadership and stress on performers. We really push our students to think and apply beyond their own expectations and develop as young adults, ready for life after school.

Component 03, focuses on the sociological and contemporary issues that influence and affect physical activity and sport for both the audience and the performer and how sport affects society.

Our lessons include: Open discussion / Student presentations / Group / pair work/ Debates / Text analysis / Outside research / Independent Learning / Investigative / Reflective and responsive (to feedback)

Term	Topics Covered (Date completed by and number of lessons)	Skills/AOs/interleaved content	Assessment (date and nature of assessment)
Yr 12 Autumn 1	<p><b>*Hand in Summer Work, Course Outline and Expectations, Practical Activity Choices &amp; Deadlines</b></p> <p><b>PSYCHOLOGICAL FACTORS AFFECTING PERFORMANCE</b></p> <p><b>Skill Acquisition</b></p> <ul style="list-style-type: none"> <li>• Classification of skills (2 weeks)</li> <li>• Types and methods of practice (2 weeks)</li> <li>• Transfer of skills (1 week)</li> </ul> <p><b>PHYSIOLOGICAL FACTORS AFFECTING PERFORMANCE</b></p> <p><b>Applied anatomy and physiology</b></p> <ul style="list-style-type: none"> <li>• Skeletal Systems (2 weeks)</li> <li>• Muscular Systems (2 weeks)</li> <li>• Cardiovascular System (2 weeks)</li> </ul>	<p>A01: Demonstrate knowledge and understanding of the factors that underpin performance and involvement in physical activity and sport</p> <p>A02: Apply knowledge and understanding of the factors that underpin performance and involvement in physical activity and sport</p> <p>A03: Analyse and evaluate the factors that underpin performance and involvement in physical activity and sport.</p> <p>Skills: Explain, Examine, Discuss, Evaluate, Assess, Time management, Understanding, Critically Evaluate, Compare and Contrast, Define, Illustrate, State, Summarise and Technical language.</p>	<p><b>Assessment Skill Acquisition Classifications of skill and Types and Methods of Practice Methods (16marks)</b></p> <p><b>Assessment on applied anatomy and physiology Skeletal and Muscular System (16 marks)</b></p> <p><b>Internal assessments completed by 1.10.21</b></p>
